**DETAILED ACTION**

***Response to Amendment***

1. The present Office action is made in response to the amendment filed on 9/21/2006. It is noted that in the amendment, applicant has amended claim 5 and canceled claim 25. The remaining claims 1-2, 4-16 and 21-24 are examined in this Office action. Note that claims 3 and 17-20 were canceled in the amendment filed on 5/5/2005 and 6/25/2003, respectively.

***Drawings***

2. The drawings contained six sheets of figures 1-6 were received on 6/25/2003. These drawings are approved by the examiner.

***Specification***

3. The objection to the specification as set forth in the previous Office action is overcome by the applicant's arguments. A review of the specification in page 18 and figure 5 has resulted that the Examiner has agreed that the features recited in claims have supported from the specification.

***Claim Rejections - 35 USC § 112***

4. The rejection of claims 1-2, 4-16 and 24-25 under 35 U.S.C. 112, second paragraph, are now overcome by the amendments to the claim and by the applicant's arguments.

***Allowable Subject Matter***

5. Claims 1-2, 4-16 and 21-24 are allowed.
6. The following is an examiner's statement of reasons for allowance:
  - a) The telescope as claimed in each of independent claims 1 and 21 is patentable with respect to the prior art, in particular, the U.S. Patent Nos. 3,603,664; 3,791,713; and 2,753,760 by the limitations related to the structure of the telescope. It is noted that while a telescope having a curved support device for supporting a telescope frame having a circular-shaped exterior cross-section which telescope comprises objective lens, mirrors for bending light and ocular lens is disclosed in the teachings provided by the mentioned references; however, the references in combination do not disclose a telescope having the mentioned features and a translucent screen arranged in the telescope so that an image of the sun projected onto the screen is visible from a face opposite of the screen from the objective lens, the at least two folding devices and the second lens and the image is observable from the exterior of the telescope frame as claimed.
  - b) The device as claimed in independent claim 24 is patentable with respect to the prior art, in particular, the U.S. Patent Nos. 3,603,664; 3,791,713; and 2,753,760 by the limitations related to the structure of the telescope. It is noted that while a telescope having a curved support device for supporting a telescope frame having a circular-shaped exterior cross-section which telescope comprises objective lens, mirrors for bending light and ocular lens is disclosed in the teachings provided by the mentioned references; however, the references in combination do not disclose a telescope having

the mentioned features and an arrangement of the objective lens, the at least two light folding devices and the second lens inside the telescope so that an image of the sun projected onto the interior surface of the telescope frame which interior surface is located on an opposite face from the at least two folding device and the second lens and the image is observable from the outside of the telescope frame as claimed.

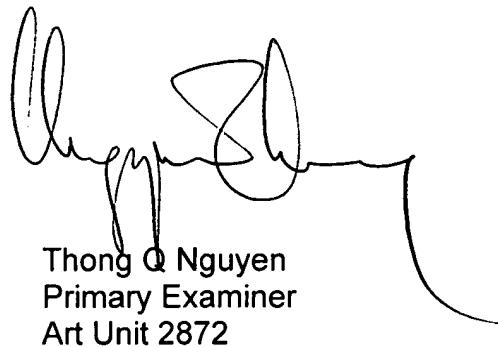

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
